Heerbrugg, Switzerland/Berlin, Germany

Optical beam guidance systems for ophthalmic lasers

SwissOptic AG – a company of the Berliner Glas Group – develops and manufactures customer-specific beam guidance systems that are used in all areas of ophthalmology.

For more than ten years SwissOptic AG has supplied optical systems to big manufacturers of ophthalmic medical devices used for laser-based eye surgeries (cataract and lasik). These optical systems optimally comply with the specifications of the complete system of the customer. Due to these many years of market experience the SwissOptic experts know the physiological requirements of eye treatments and surgeries and improve the optical systems continuously.

The range of solutions that SwissOptic offers in the market segment ophthalmology includes beam expansion systems, zoomable lenses to focus from cornea to lens at various depths, visual systems for the observation duct as well as optical components for OTC applications.

The reliable in-house qualification and documentation of the systems guarantee high product and patient safety.

SwissOptic AG is a long-term partner for its customers along the entire value chain – from concept to volume production.

Please visit the website to learn more about the optical solutions SwissOptic offers for ophthalmic devices:
