

# PRESS RELEASE

20 November 2017  
Berlin, Germany

## High-tech applications with light The Berliner Glas Group makes light work

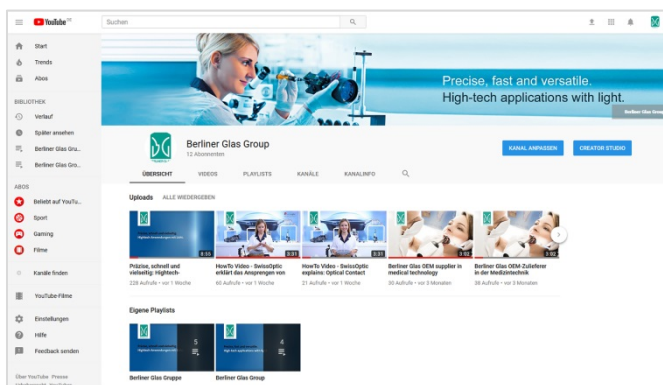

The use of light-based technologies opens up many opportunities to find better and more sustainable solutions for numerous applications. Light-based technologies are indispensable for production technology, metrology or medical technology. And this is where the Berliner Glas Group is involved: with its optical key components, assemblies and systems the Berliner Glas Group is making a substantial contribution to harness the extraordinary characteristics of light.

Join the Berliner Glas Group on a journey to a world where it is possible to process light industrially and watch the new video: Precise, fast and versatile: high-tech applications with light.

The video can be found at the Berliner Glas Website
